

SmartHome Hub™ User Manual

Version 1.0

Thank you for purchasing the SmartHome Hub™ — the all-in-one control center for your connected lifestyle.

1. Introduction

The SmartHome Hub™ allows you to seamlessly control, automate, and monitor your smart devices from one central interface. It connects to Wi-Fi, Bluetooth, and Zigbee-enabled devices, providing voice command capabilities and automation scheduling for your home ecosystem.

Package Contents:

- 1 × SmartHome Hub device
- 1 × Power adapter
- 1 × Ethernet cable
- 1 × Quick Start Guide

2. Setup & Installation

Follow the steps below to set up your SmartHome Hub™:

- 1 Connect the power adapter to your SmartHome Hub™ and plug it into a power outlet.
- 2 Wait for the LED indicator to turn blue, signaling that the hub is powered on.
- 3 Download the SmartHome app from the App Store or Google Play Store.
- 4 Open the app and sign in or create a new account.
- 5 Follow the on-screen instructions to connect the hub to your Wi-Fi network.
- 6 Once connected, the LED indicator will turn green, confirming successful setup.

Troubleshooting Tips:

If your hub fails to connect to Wi-Fi, ensure your router is broadcasting on 2.4GHz and that your password is correct. You can also restart the hub by pressing and holding the reset button for 10 seconds.

3. Using SmartHome Hub

Once setup is complete, the SmartHome Hub™ gives you access to a full suite of home automation features. You can create schedules, scenes, and triggers that activate devices automatically based on your preferences.

Voice Commands:

- “Hey SmartHome, turn on the living room lights.”
- “Hey SmartHome, set thermostat to 72 degrees.”
- “Hey SmartHome, lock all doors.”

Mobile App Features:

Through the SmartHome app, you can monitor device status, receive alerts, and configure advanced automation workflows. The app also includes real-time energy usage analytics, helping you optimize efficiency and reduce costs.

4. Maintenance and Safety

Keep your SmartHome Hub™ clean and free from dust. Avoid exposing it to liquids or extreme temperatures. Use only the supplied power adapter. For best performance, place the hub in a central location away from metal obstructions and other wireless devices.

Firmware Updates:

SmartHome Hub™ automatically updates its firmware when connected to the internet. Do not disconnect the device during updates. You can manually check for updates in the SmartHome app under Settings > Device Info > Firmware Update.
